Low profile Chromium guides on all leger rods

MATCH WINNER LEGER

MATCH WINNER FLOAT

Match Winner - the match winning range for any occasion

Designed and made in the UK this sensational collection of quality float and feeder rods has received Wills extensive input, and of course his usual thorough attention to detail.

Created around some of Daiwa's unique design features, Match Winner rods blend MH58M with Whisker carbon to deliver a performance and feel that has surpassed even Wills' very high standards.

The exciting V-Joint utilises 'Bias Carbon Construction' to return joints that curve with the rod. What you get is a pure seamless action, as if it were made as one

single piece.

As used by Will this repertoire of ten models deliver a match winning formula for any peg. Whether you choose the 15' XXP for hitting 'lumps down the edge' or need a 12' medium quiver for skimmers this collection will live up to it's name.

And when you take a look at the Promo Prices you'll see you're already a winner!

Bias Carbon Construction on V-joint

V-joint technology featured on all models

Match Winner by

For your nearest Daiwa stockist visit: www.daiwasports.co.uk
